Professional Summary

Senior Product Designer and UX Systems Lead with 12+ years of experience turning complex workflows into intuitive, scalable interfaces across enterprise, SaaS, and regulated industries. I specialize in building cohesive design systems, crafting clean UI that scales, and rapidly converting Figma designs into front-end code. My recent work blends AI-driven interaction design, on-boarding automation, and real-time dashboards integrated with platforms like ServiceNow and Angular. A hands-on collaborator with product, engineering, and operations teams, I deliver experiences that balance clarity, speed, and impact—especially in fast-paced, highly regulated environments.

Technical Skills

Design Tools:
Figma (components, tokens, variables, Dev Mode), Adobe XD, Sketch, Axure, InVision, Creative Suite, Miro, HotJar, CrazyEgg

Development:
HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, Node.js

Frameworks & Libraries:
Angular (up to 19.2), Vue.js, React, Storybook, Bootstrap, Material UI, Chart.js, Kendo UI, Power BI

UX & Product Strategy:
User Research, Usability Testing, A/B Testing, Journey Mapping, Persona Development, UX Audits, Accessibility (WCAG/HIPAA)

Systems & Tooling
Design Systems Development, Tokenized Theming, Responsive Design, CI/CD Hand-off, Git/GitHub, Agile (Scrum/Kanban), ServiceNow Integration, Azure AI Document Intelligence

---

Education

Bachelor of Fine Arts
The Illinois Institute of Art - Chicago, IL
GPA: 3.8 2000-2005

Professional Experience

VistaLumina (Freelance)
Lead *Senior Product Designer & UX Engineer (Contract)*
Remote | Feb 2025 – Present

- Leading the design and front-end development of an AI-powered ERP platform using Angular 19+, focused on reducing inventory tasks to 3 clicks or less through conversational AI.
- Designed and implemented an AI onboarding assistant that parses scanned or handwritten W-9 forms using Azure Document Intelligence, extracts key data, and prompts users to fill in missing fields for submission.
- Built and maintained a component-based design system in Figma, aligned with enterprise accessibility standards (WCAG) and token-based theming for rapid scaling.
- Partnered with product and engineering teams to prototype, validate, and ship user flows that improved operational efficiency across logistics, onboarding, and inventory workflows.
- Integrated data-driven logic from ServiceNow to support predictive ordering and intelligent task automation, significantly streamlining decision-making for users.

Teradata
Design Systems Architect & Front-End Developer (Contract)
Remote | Mar 2024 – Jan 2025

- Spearheaded the design and engineering of a multi-brand design system supporting enterprise-scale product lines, built in Figma and implemented in Angular.
- Created token-based theming architecture using CSS variables to enable dynamic brand switching, dark mode support, and accessibility alignment across all products.
- Developed reusable component libraries with Storybook and Napsack, integrating into CI/CD pipelines for scalable dev handoff and consistent implementation.
- Conducted usability testing and design audits to define reusable UX patterns and visual consistency across teams.
- Collaborated closely with engineering leads to standardize design-to-code workflows and accelerate UI development velocity across distributed teams.

Becton Dickinson/CareFusion
Senior Lead Product Designer & Front-End Architect
Remote | Mar 2017 – Jan 2024

- Led the end-to-end design and implementation of a global multi-brand design system used across 10+ internal healthcare platforms in a highly regulated (HIPAA) environment.
- Architected token-based theming using Figma variables and CSS custom properties to support brand switching, accessibility (WCAG), and dark mode.
- Built atomic component libraries in Angular, documented in Storybook, and integrated into CI/CD workflows to ensure design–dev alignment and scalability.
- Partnered with product, clinical, and engineering teams to deliver complex enterprise UI with a focus on accessibility, clarity, and operational efficiency.
- Conducted UX audits and consolidated legacy UI libraries, reducing duplication and improving adoption across distributed product teams.

SNH Inc. (NCC Credit)
Lead Product Designer and UI Engineer
Hybrid/San Diego | Oct 2015 – Dec 2016

- Led the UX and front-end development of a next-gen automotive CRM platform, delivering a working MVP in under 3 months.
- Designed user flows, personas, and low-to-high fidelity prototypes, validating interaction patterns through iterative testing.
- Built all UI components using HTML5, SCSS, and Angular, optimizing for speed, maintainability, and responsive mobile access.
- Collaborated with cross-functional teams to ensure feature alignment with user goals, dealership workflows, and compliance standards.
- Improved overall usability and feature adoption by applying user-centered design practices to critical areas like inventory tracking, deal flow, and lead management.

ServiceNow
Sr. UI Designer & Front-End Developer
San Diego, CA | Sept 2014 – Sept 2015

- Designed and developed a scalable style guide to unify UI patterns across product teams, improving visual consistency and development speed.
- Built reusable SCSS components and delivered production-ready HTML/CSS for new and existing features, including the Visual Task Boards experience.
- Conducted usability testing sessions and implemented improvements based on user feedback to streamline task management workflows.
- Partnered with designers and engineers to establish a shared design language and reduce inconsistencies across internal tools and customer-facing platforms.

DealerSocket
Sr. UI/UX Designer and Front-End Developer
San Clemente, CA | July 2013 – Sept 2014

- Led the redesign of the company's core CRM system, improving usability and modernizing the user interface for both desktop and mobile environments.
- Conducted user testing and stakeholder interviews to inform wireframes and visual design, ensuring alignment with dealer workflows and sales goals.
- Built responsive UI components using HTML, SCSS, Angular, and Kendo UI, replacing legacy code with modular, scalable front-end architecture.
- Partnered with product managers and engineers in an agile environment to deliver features on tight sprint timelines with high implementation fidelity.

MaintenanceNet (Now Cisco)
UI/UX Designer and Front-End Developer Carlsbad, CA | April 2011 – June 2013

- Designed wireframes, high-fidelity mockups, and prototypes for the ServiceExchange application, focusing on user workflows in quoting and contract management.
- Developed cross-browser compatible front-end code using HTML5, CSS3, and LessCSS, optimized for performance and responsiveness.
- Supported production and quoting teams by designing and building reusable HTML email templates compatible across clients and devices.
- Delivered visual and presentation assets for sales and marketing, ensuring consistency across customer-facing materials. presence.
